Sh1doow

Penetration Tester

✉ dishantchaudhary86@gmail.com 🔗 Dishantchaudhary.me 𝕏 Sh1doow ⌨ Sh1doow

WHO AM I?

An VAPT Analyst with hands-on experience in corporate network penetration testing, and a strong foundation built over years through CTFs, hands-on labs, and self-driven security research- driven by a CyberSecurity forward mindset. I possess a strong understanding of IT security technologies and toolsets, with extensive hands-on experience in Linux, AD, Web, and Network penetration testing. I am highly interested in working as a Penetration Tester to leverage my expertise in safeguarding interconnected devices and networks.

WORK EXPERIENCE

Cyber Security Intern   06/2024 – 07/2024
Gurugram Police (GPCSSI)
- Contributed to the development of security tools for investigations.
- Assisted in threat intelligence analysis and cybercrime investigations

PROJECTS

Hash-Buster
https://github.com/Sh1dOOw/Hash-Buster

Developed a Python-based hash-cracking tool to identify and break password hashes using custom wordlists and multi-threaded processing.

Auto-Enum
https://github.com/Dishant-Chaudhary/Auto-Enum

Auto-Enum is an automated enumeration tool designed to assist penetration testers in quickly identifying vulnerabilities within a target system. It leverages Nmap for service discovery and integrates with Searchsploit to find potential exploits.

IOC-Checker
https://github.com/Sh1dOOw/IOC-Checker

IOC-Checker is an open-source IOC (Indicators of Compromise) analysis tool to automate threat intelligence gathering by scanning files, URLs, and IPs against multiple security databases.
